Summary

Software Quality Assurance & Technical Support Engineer at Slash Plus with hands-on experience in manual and automation testing, test case creation, API and performance testing, and customer issue resolution.

With a background in frontend development and UI/UX, I bring a strong user-focused mindset to quality assurance, helping identify usability and functional issues early in the development lifecycle.

Skilled in Playwright, JMeter, Postman, and modern web technologies, driven by continuous learning and building reliable, user-centered software products.

Education

PUSAT College

Bachelor in Information Technology

Biratnagar, Nepal

July 2020 – July 2025

- Affiliated with Purbanchal University
- Strong foundation in software development, testing, and UI/UX design

Experience

QA and Technical Support Engineer

Slash Plus

Nepal

Dec 2025 – present

- Performed manual and automation testing to ensure software quality and stability
- Created and executed test cases, reported bugs, and verified fixes
- Handled customer-reported issues and provided technical support
- Collaborated with developers and product teams to improve user experience

QA and Technical Support Intern

Slash Plus

Nepal

Sept 2025 – Dec 2025

- Assisted in functional, regression, and smoke testing
- Documented bugs with clear reproduction steps
- Configured routers, cameras, and troubleshoot hardware and software issues

Frontend & UI/UX Intern

Blue Fox

Itahari, Nepal

Oct 2024 – Dec 2024

- Designed responsive UI components
- Created wireframes and prototypes using Figma
- Collaborated with developers to implement UI designs

Frontend & UI/UX Intern

IT Service Nepal

Biratnagar, Nepal

Sept 2024 – Oct 2024

- Developed frontend interfaces using HTML, CSS, and JavaScript
- Improved usability and visual consistency of web applications

Skills

Testing & QA: Manual Testing, Unit Testing, Integration Testing, Playwright, Postman, JMeter **Frontend**

Development: JavaScript (ES6+), React.js, Hooks, Tailwind CSS, Bootstrap, HTML5, CSS3 **Design & UX:** Figma

(wireframing, prototyping, design systems), responsive design, usability testing **Backend & Databases:** PHP,

Firebase, MySQL

Soft Skills: User Research, Critical Thinking, Problem-Solving, Adaptability, Team Collaboration, Project Management, Time Management, Communication & Presentation

Projects

1) Combine Signage Project

Description:

A hybrid token and digital signage system that allows organizations to display advertisements on specific screen sections while managing customer tokens in another section. The system generates tokens with QR codes, enabling customers to provide feedback through scanning.

Tasks & Responsibilities:

- Performed functional and UI testing across token display and advertisement sections
- Validated QR code generation and feedback flow
- Tested token calling workflow and screen rendering
- Ensured overall system usability and smooth user experience

2) Nabil Token System Project

Description:

A hybrid token management and digital signage system designed for banking environments. The system supports advertisement display, token calling, QR-based customer feedback, and real-time forex display on screens managed through the system.

Tasks & Responsibilities:

- Conducted end-to-end testing of the token management system
- Tested advertisement display, token calling, and forex display features
- Identified, documented, and tracked functional and UI issues
- Verified bug fixes and ensured system stability before deployment

3) MSignage Project

Description:

A digital signage platform developed to display various types of advertisements, including images and videos, on client screens.

Tasks & Responsibilities:

- Tested UI components and screen layouts
- Reported UI inconsistencies and workflow issues

4) Sajha Yatayat Project

Description:

A comprehensive fleet, traffic, inventory, HR, and maintenance management system for Sajha Yatayat. The system includes modules for vehicles, routes, stations, fuel management, maintenance, inventory, procurement, attendance, leave, and dashboards for operational monitoring.

Tasks & Responsibilities:

- Tested the system from the initial development phase
- Performed end-to-end functional testing across all modules
- Conducted extensive UI testing to ensure consistency and usability
- Verified dashboards, reports, and workflows for accuracy
- Logged bugs, retested fixes, and ensured overall system reliability
