

Rabi Kumar Roy

📍 Kirtipur, Nepal ✉ rrabir9815@gmail.com ☎ 981-5811311 🌐 Portfolio Website 🔗 LinkedIn 🐙 Github

Software QA Engineer with 1+ year of experience in manual and automation testing across web and enterprise applications, ensuring high-quality software delivery in Agile environments. Experienced in Playwright, Postman, API testing, SQL validation, performance testing using JMeter. Executed 1,000+ test cases with 95%+ defect detection accuracy and significantly reduced production issues through structured regression cycles. Experienced in building Playwright automation scripts, increasing test coverage, and improving release stability. Strong knowledge of SDLC, STLC, and defect lifecycle management, consistently ensuring faster releases, improved software reliability, and effective collaboration with development and product teams across projects and environments.

Education

Purbanchal University | PUSAT College
Bachelor in Information Technology

Biratnagar, Nepal
July 2020 – July 2025

Experiences

Software QA Engineer

Dec 2025 – present

Slash Plus

- Designed and executed 1,000+ test cases ensuring 98% defect detection accuracy across enterprise web applications.
- Performed manual and automation testing using Playwright, improving test efficiency and regression coverage.
- Conducted API testing using Postman, validating endpoints and ensuring reliability and system stability.
- Executed performance and load testing using Apache JMeter
- Collaborated with developers and product teams to improve user experience.

QA and Technical Support Intern

Sept 2025 – Dec 2025

Slash Plus

- Executed 500+ manual test cases ensuring 97% functional accuracy across web and digital signage applications.
- Developed detailed test scenarios and clear reproduction steps, increasing test coverage and reducing production defects significantly.
- Supported functional, regression, and smoke testing cycles, ensuring smooth production deployment processes.
- Performed system configurations and troubleshooting for routers, display devices, and hardware integrations.

Frontend & UI/UX Intern

Oct 2024 – Dec 2024

Blue Fox

- Designed responsive UI components
- Created wireframes and prototypes using Figma
- Collaborated with developers to implement UI designs

Frontend & UI/UX Intern

Sept 2024 – Oct 2024

IT Service Nepal

- Developed frontend interfaces using HTML, CSS, and JavaScript
- Improved usability and visual consistency of web applications

Skills

Testing & QA: Manual Testing, Unit Testing, Integration Testing, Playwright, Postman, JMeter, Trello, Jira

Frontend Development: JavaScript (ES6+), React.js, Hooks, Tailwind CSS, Bootstrap, HTML5, CSS3

Design & UX: Figma (wireframing, prototyping, design systems), responsive design, usability testing

Backend & Databases: MySQL, PHP, Firebase.

Soft Skills: User Research, Critical Thinking, Problem-Solving, Adaptability, Team Collaboration, Project Management,

Projects

Queue Management System - SaaS Platform: Hybrid Queue management and digital signage platform with QR-based feedback.

- Performed end-to-end manual testing of web and kiosk applications.
- Designed and executed functional, regression, integration, and UI test cases.
- Automated regression test scenarios using Playwright and Conducted API testing using Postman.
- Performed SQL validation to verify database integrity and data consistency.
- Executed performance and load testing using Apache JMeter.
- Identified, reported, and tracked defects throughout the defect lifecycle.
- Collaborated with developers and stakeholders to ensure stable, high-quality production releases.
- Validated production deployments across 100+ client locations, including banks, hospitals, and government offices.

Transport Management ERP - SaaS Platform: Comprehensive ERP solution for transportation companies, enabling fleet operations, GPS and live camera monitoring, HR management, payroll, accounting, maintenance, inventory, and reporting. Currently used by leading transportation companies including Sajha Yatayat, Mahanagar Yatayat, and Yoyo Bus Sewa.

- Performed end-to-end functional, integration, and UI testing across multiple ERP modules.
- Tested Fleet Management, including GPS tracking and live camera monitoring.
- Validated HR modules, including attendance, leave management, payroll, and employee workflows.
- Tested Accounting, Inventory, Maintenance, and Reporting modules to ensure business process accuracy.
- Designed and executed test cases for dashboards, reports, and end-to-end workflows.
- Conducted API testing using Postman and SQL validation to verify backend data integrity.
- Performed regression testing to ensure application stability after feature updates.
- Identified, reported, and tracked defects, collaborating with developers to ensure reliable, production-ready releases.

Food Ordering System - SaaS Platform: Cloud-based food ordering and restaurant management system developed for cafés and restaurants. Successfully launched with its first production deployment at Central Café, Singhadurbar.

- Performed end-to-end functional, integration, and UI testing of the food ordering platform.
- Validated customer ordering, kitchen workflow, billing, payment processing, and order management modules.
- Conducted API testing using Postman and Performed SQL validation to ensure data integrity across orders, customers, and transactions.
- Executed regression testing to verify application stability after new feature releases.
- Identified, reported, and tracked defects, collaborating closely with developers to ensure production-ready releases.
